

DMMS ISO 11425:2018 Rubber hoses and hose assemblies for automobile power-steering systems —
Specification

Scope

This document specifies requirements for five types of hose and hose assembly used in automobile power-steering systems, the five types differing in their pressure ratings and volumetric expansion. They are for use with fluids in the temperature range $-40\text{ }^{\circ}\text{C}$ to $+135\text{ }^{\circ}\text{C}$.

This document is based on performance tests. In order to take account of technological developments, no requirements are included for specific materials, detailed construction or manufacturing methods.
