

**DMMS ISO 12122-6:2017- Timber structures- Determination of characteristics values-Part 6:
Large components and assemblies**

Scope

This document specifies methods of determination of characteristic values for a defined population of large components and assemblies, calculated from test values. It establishes two methods for the determination of characteristic values:

- a) direct calculation from test values;
- b) calculation from a resistance model, which is firstly calibrated from test results, including calculation of error terms.
